DETAILED ACTION

Response to Amendment

1. The declaration under 37 CFR 1.132 filed 16 SEP 2009 is sufficient to overcome the rejection of claims 1-12 and 23 based upon the arguments presented 16 SEP 2009.

Response to Arguments

2. Applicant's arguments, see below, filed 16 SEP 2009, with respect to Claims 1-12 and 23 have been fully considered and are persuasive. The rejections of said claims have been withdrawn.

3. Applicant's first argument is that it would not have been obvious to combine the teachings of Klotz and Bomberger as those in the art would not have believed them to be applicable to each other. Applicant's further showings indicate that titanium does not corrode in seawater at normal temperatures, which the coating of Klotz is meant to inhibit. Further, Applicant shows that the teachings of Troczynski indicate that the teachings of Bomberger are of a high enough temperature that they would damage the substrate of Klotz, which would mean that significant testing would be required and therefore that the combination would not be obvious. Examiner agrees.

Allowable Subject Matter

4. Claims 1-12 and 23 are allowed.

5. As discussed above, Klotz teaches a method of forming an anti-corrosion coating on a magnesium substrate or other such metals that corrode by salt spray, while Bomberger teaches that applying anti-corrosion coatings to titanium substrates to prevent them from corrosion by salt spray is desirable. However, Applicant has shown

Art Unit: 1792

that the methods of Bomberger would damage the substrate of Klotz, and further that the base metals are different enough that a coating that protects magnesium at standard temperatures cannot be expected to similarly protect titanium at elevated temperatures without significant testing. The other references cited do nothing to overcome this deficiency.
